CAREER OBJECTIVE

Computer Science and Engineering graduate (B.Tech, 2026) with hands-on experience in web development, AI, and backend systems. I enjoy building clean, easy-to-use interfaces with HTML, CSS, and JavaScript, and connecting them to working backends using APIs, databases, and frameworks like Next.js and FastAPI. I have built and deployed real projects, including an AI-based legal consultation platform and a farmer assistance tool. Looking for a developer role where I can keep learning, solve real problems, and grow as an engineer.

EDUCATION

Bachelor of Technology (B.Tech) - Computer Science & Engineering (2022 - 2026)

Guru Nanak Institute of Technology, Kolkata, WB | CGPA: 7.8

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, JavaScript
- **Frontend Development:** HTML, CSS, JavaScript
- **Backend & APIs:** API Integration, REST APIs, Database Management (MySQL, PostgreSQL, Supabase)
- **Artificial Intelligence:** Machine Learning, AI Agentic Systems, AI Tool Integration
- **Core CS:** Data Structures & Algorithms (DSA)
- **Tools & Platforms:** VS Code, Git & GitHub, Linux, Chrome Developer Tools
- **MS Office & Analytics:** MS Word, MS Excel, PowerPoint, Power BI

PROJECTS

Nyaya AI – Multilingual Legal Consultation Platform (Personal Project)

- Built a full-stack legal consultation platform enabling users to chat with an AI legal assistant, upload documents, request consultations, and track payment status in real time.
- Implemented secure user authentication and JWT-based authorization for both user and admin roles.
- Developed an admin dashboard for managing users, consultations, and payment verification.
- Integrated automated email notifications using Brevo SMTP for consultation and payment updates.
- Designed a database-driven architecture using PostgreSQL (Supabase) for scalable user and consultation management.
- Live Link: <https://nyaya-ai-website.vercel.app/>

AI-Based Farmer Assistance Platform (Personal Project)

- Developed an AI-powered platform that helps farmers get agriculture-related information and guidance.
- Designed a simple and user-friendly interface for easy accessibility.
- Integrated AI capabilities to improve response quality and user experience.
- Worked on application structure, testing, debugging, and feature improvements.
- Focused on scalability so future features such as crop recommendations, weather updates, and market price information can be added easily.
- Live Link: <https://krishi-dost-ai.vercel.app/>

Mental Health Support System (Academic Project)

- Developed a web-based platform for mental health support and awareness.
- Built backend functionality using Flask and MySQL.
- Designed and integrated REST APIs for communication between application components.
- Performed testing, debugging, and issue resolution to improve reliability.
- Collaborated with team members and maintained project documentation.

HOBBIES & INTERESTS

Learning New Technologies • Travelling • Watching thriller and suspense movies • Solving logical problems • AI Tools and Applications • Database Technologies

SOFT SKILLS

Teamwork & Communication • Willingness to Learn & Improve • Problem Solving • Coordination • Client-Focused Thinking • Following Guidelines • Adaptability • Analytical Thinking • Quick Learning Ability
